ABOUT ALGARVE'S WINE...

The Algarve has been a dynamic wine-growing region since the time of the Phoenicians and Greeks right up to the present day. Algarve wine supplied Portuguese caravels and trade with Africa and Asia. There was a golden period in the 18th century, but crises such as the French invasions and phylloxera affected production.

Here, at Senses, the focus is on raising awareness and helping to develop our region's wines.
